Statistics graduate from Institut Teknologi Sepuluh Nopember (ITS) with practical experience in data analytics, reporting automation, data validation, and business process improvement. Experienced in working with cross-functional data to improve reporting accuracy, strengthen operational control, and support data-driven decision-making. Built analytical and automation tools that help stakeholders review performance, identify inefficiencies, and translate complex data into clearer business insights. Proficient in Excel, Python, SQL, Power BI, Tableau, and Looker Studio, with strong analytical thinking and interest in applying data analysis to solve business and operational problems.

EDUCATION

- Institut Teknologi Sepuluh Nopember - Surabaya, Indonesia** **July 2021 - Sept 2025**
Bachelor Degree in Statistics | GPA 3.68 / 4.00 (Cum Laude)
- Bangkit Academy by Google** **Feb 2024 - Jun 2024**
Machine Learning Cohort | Score 95.78 / 100.00 (Distinction Graduate)

PROFESSIONAL EXPERIENCE

PT Salam Pacific Indonesia Lines (PT SPIL)

- Accounting Data Analyst (Full Time)** **Oct 2025 - Present**
 - Analyzed cross-functional operational, procurement, and financial data to support cost control, reporting accuracy, and strategic decision-making in a shipping and logistics business environment.
 - Developed web applications to automate end-to-end reconciliation and reporting workflows, reducing monthly reporting time by more than 30 hours and improving reporting accuracy.
 - Developed an anomaly detection framework for procurement data by standardizing and classifying highly unstructured item descriptions, helping the accounting department identify unusual transaction patterns and strengthen procurement control.
 - Refined a handed-over roundtrip mapping prototype into a practical operational tool for analyzing unloading and loading activities, helping logistics teams identify more efficient trucking pairings and reduce empty-trip opportunities.
 - Partnered with internal departments to clarify data issues, align reporting requirements, and turn unclear operational records into structured insights for stakeholder review.
- Finance Data Analyst (Internship)** **Apr 2025 - Sept 2025**
 - Developed an optimization algorithm for container-vendor allocation that reduced average repair costs by 10% and supported more efficient vendor selection decisions.
 - Analyzed container repair data to identify vendor inefficiencies, cost patterns, repair trends, and anomalies that could affect operational performance and cost control.
 - Built and maintained Power BI dashboards to monitor key operational metrics, business performance trends, and areas requiring management attention.

Institut Teknologi Sepuluh Nopember (ITS)

- Lecturer Assistant (Contract)** **Feb 2023 - Dec 2024**
 - Served as a Lecturer Assistant for Calculus I, Calculus II, Database, and Data Warehouse courses.
 - Guided students in structured problem-solving, SQL, database concepts, ETL workflows, and dashboard development.
 - Developed and evaluated assignments and assessment questions to measure students' understanding of course materials and analytical concepts.
- Research Assistant (Contract)** **Aug 2024 - Dec 2024**
 - Contributed to sentiment analysis research on the Indonesian Government Securities (SUN) market as part of an ITS-DJPPR research collaboration.
 - Collected online news data through scraping from multiple platforms and performed sentiment analysis using VADER to assess public opinion.
 - Analyzed sentiment patterns and translated the results into clear visualizations for research reporting and stakeholder discussion.

ORGANIZATIONAL EXPERIENCE

Professional Statistics (PSt) - HIMASTA ITS

- Vice Chairman** **Mar 2024 - Feb 2025**
 - Partnered with the Chairman to lead and oversee all work programs and agendas executed by 50 members.
 - Played a key role in developing the concept for a collaboration program with the Sidoarjo Regency Office of Cooperatives, which successfully generated a new revenue stream for the organization.
 - Resolved inter-divisional communication gaps through monthly alignment meetings.

- **Staff of Research and Data Analytics Division**

Mar 2023 - Mar 2024

- Managed SITASI, a free statistics study and consultation program for ITS Statistics students.
- Coordinated tutor selection, learning facilities, schedules, and participant communication for more than 170 student registrations.
- Contributed to a performance appraisal score above 90 through structured execution and coordination of the SITASI program.

Pekan Raya Statistika 2023

- **Head of Conference Subject Data Analytics Competition**

Nov 2022 - Oct 2023

- Led a team of 9 in the end-to-end project management for the development of materials for an ASEAN-level data analytics competition.
- Led the question development process by overseeing team contributions and incorporating supervisor feedback to ensure quality and relevance.
- Directed project strategy, successfully established data partnerships through negotiation, and served as the main communication liaison with external stakeholders.

ACHIEVEMENT

- **1st Place Winner, Dataquest 3.0 part of Aironology 3.0:** Developed a data-driven infographic on the dangers of smoking by collecting relevant data, analyzing key patterns, and translating insights into clear visual storytelling.
- **3rd Place Winner, ACTION by Data Science UNESA:** Developed a data-driven infographic on carbon emission issues by analyzing supporting data and communicating the findings through structured and accessible visual information.
- **Distinction Graduate, Bangkit Academy 2024:** Completed the Machine Learning learning path with a score of 95.78 / 100.00 and graduated in the top 10 percent of participants.
- **Top 50 Capstone Project, Bangkit Academy:** Built the machine learning component for MoodMate, a journaling application that classifies user emotions from text input.
- **Semifinalist, National Statistics Competition Universitas Brawijaya 2023:** Advanced to the semifinal stage in a national-level statistics competition.

FEATURED PROJECT ([VIEW PROJECT](#))

- **Auto Reporting and Reconciliation Tools**

Tech Stack: Python, Streamlit, Pandas

- Developed internal tools to automate reporting and reconciliation processes, reducing monthly reporting time by more than 30 hours while producing structured outputs for monitoring and review.
- Strengthened review accuracy by standardizing repetitive checking processes and reducing dependency on manual file handling.

- **Container Repair Cost Optimization**

Tech Stack: Python, Streamlit, Pandas

- Built a decision-support tool to analyze repair cost efficiency and recommend vendor allocation based on operational and cost considerations.
- Compared vendor options, validated material references, and generated structured allocation outputs, contributing to a 10% reduction in average repair costs.

- **Roundtrip Mapping Optimization**

Tech Stack: Next.js, FastAPI, Python, TypeScript, Leaflet, Valhalla

- Refined a handed-over roundtrip mapping prototype by resolving bottlenecks and improving operational usability.
- Enhanced route processing and optimization workflow to align the tool with operational team needs.
- Applied route, time, distance, and branch constraints to support unloading-loading pairing analysis.

CERTIFICATION

- **Dev Certified for Machine Learning with TensorFlow**
- **Machine Learning Specialization** - DeepLearning.AI
- **Mathematics for Machine Learning and Data Science Specialization** - DeepLearning.AI
- **DeepLearning.AI TensorFlow Developer Specialization** - DeepLearning.AI
- **TensorFlow: Advanced Techniques Specialization** - DeepLearning.AI
- **TensorFlow: Data and Deployment Specialization** - DeepLearning.AI

SKILL

- **Interpersonal:** Team Management, Stakeholder Communication, Problem-Solving, Critical Thinking, Data-Driven Decision Making.
- **Core Skills:** Logistics Data Analysis, Operational Performance Monitoring, Data Visualization & Storytelling, Dashboard Development, Forecasting, Process Automation, Machine Learning, Statistical Modeling, NLP, Predictive Analytics, Database Management, Basic Accounting.
- **Technical:** Microsoft Office, Python, R, SQL, Power BI, Tableau, Looker Studio, Git.
